Frame Tents

Step inside the champagne coloured material exterior and you discover a party environment... from delicate block prints, embroidered mirrors and plush velvet. Choose from ten individual interior designed rooms, each decorated interior weaving a different narrative and backdrop, allowing you to create the mise-en-scène from the classical garden party to modern party palaces!

These rooms can be erected on grass, as well as hard-standing and paved areas, and are wind-tested to 55mph. They are constructed polyester-coated exterior which is both weatherproof and also completely impenetrable to UV rays; making them considerably cooler than standard marquees in summer. Due to the thickness of the exterior fabric, they are also much warmer in winter. The aluminium frame is hidden between the exterior and the highly decorative interior linings.

Frame Tents have a 2.1m wall height and can be inter-connected to create interesting 'rooms' within the same event. Having experimented with many unique layouts and combinations of interiors with secret rooms being a particular favourite addition, we now have a stock of interesting arrangements and practical ways to join the marquees together. This flexibility with arrangement makes it much easier to fit more marquees into a tight space.

They are excellent for making the most of quirkily shaped gardens which may not usually be suitable for a standard marquee or Oyster Pearl. The creative layout options that are possible with these structures to maximise the space – both inside and out – produce an interesting environment for guests to enjoy.

As with the rest of the structures, they can be used in conjunction with clear walls around the edge to maximise the setting and views and have the most rustic styling of all the tents in the collection.

The centre-poles provide a towering 6m of height to the apex in the roof, and the wooden poles around the perimeter of the tent support the walls, with the ropes and stakes extending 1.5m around the structure to give strength.

With the ability to be set up on almost any surface and with a wide span of up to a 15m width – to an almost infinite length, extendable in 3m increments - these clearspan structures are large and practical and can be lined, draped, decorated and furnished to transform them from ordinary to extraordinary. £25 a square metre including lighting and flooring and lining of choice.

INTERIORS

10m x 15m stretch tent with flooring and lighting - £3,300

Stretch Tents

These marquees can quite literally stretch over any space, creating unique party areas where normal marquees wouldn't be possible to erect. These free-form structures are ideal if you think that a marquee wouldn't be possible

in a space as they cover areas no other tent can cover!

They are the most organic of structures aesthetically and are made from a triple-ply high-tech neoprene fabric, given form by different length poles to create the height and walls.

Once staked, pegged and erected, they are extremely strong structures capable of withstanding the most extreme conditions.

Bushes and trees (up to 3.5m), gazebos, walls and different levels pose no problems as the structures can be connected to buildings using eyebolts or alternatively used as stand-alone structures.

Tents range from 3m x 4m, to 20m x 40m. It is also possible to inter-connect them to create a multitude of different shapes and options. To bring colour and texture to the blank canvas, our draping team can add swags of jewel-coloured silks or soft white voile to the interiors.

Patterned lighting projections and hanging decorations can completely transform the final effect.
